The diagram illustrates a hierarchical clustering process across three stages:

- Stage 1 (Left):** Displays numerous individual data points represented as small squares.
- Stage 2 (Middle):** Shows initial clustering where several pairs of points are connected by thin, curved lines, indicating their first merge.
- Stage 3 (Right):** Illustrates more advanced clustering. Some groups have merged into larger structures. Notably, two large central groups are each enclosed by a thick horizontal bar, representing significant clusters formed during the process.

A vertical scale on the far left is marked with the number "10" at the top, likely representing distance or linkage cost.
