

The figure displays a sequence of 15 diagrams, each representing a snapshot of a system of particles on a grid. The particles are represented by black dots within the squares. The sequence shows the following progression:

- Diagram 1: A single particle in the top-left square.
- Diagram 2: The particle moves to the bottom-left square.
- Diagram 3: The particle moves to the bottom-middle square.
- Diagram 4: The particle moves to the bottom-right square.
- Diagram 5: The particle moves to the top-right square.
- Diagram 6: The particle moves to the top-middle square.
- Diagram 7: The particle moves to the top-left square.
- Diagram 8: The particle moves to the bottom-left square.
- Diagram 9: The particle moves to the bottom-middle square.
- Diagram 10: The particle moves to the bottom-right square.
- Diagram 11: The particle moves to the top-right square.
- Diagram 12: The particle moves to the top-middle square.
- Diagram 13: The particle moves to the top-left square.
- Diagram 14: The particle moves to the bottom-left square.
- Diagram 15: The particle moves to the bottom-middle square.

The figure consists of 10 diagrams arranged horizontally, each representing a snapshot of a system of particles. The particles are represented by small squares, some white and some black, positioned above a horizontal line. The sequence of diagrams shows a process where black squares appear, move, and interact with white squares, eventually leading to a state where all squares are black.

The figure consists of eight sub-diagrams, each showing a horizontal row of squares representing numbers. The numbers are 1, 2, 3, 4, and 5. The sequence of diagrams illustrates the steps of the bubble sort algorithm:

- Diagram 1: Initial state: 1, 2, 3, 4, 5.
- Diagram 2: 1 and 2 are compared and swapped: 2, 1, 3, 4, 5.
- Diagram 3: 2 and 1 are compared and swapped: 1, 2, 3, 4, 5.
- Diagram 4: 2 and 3 are compared and swapped: 1, 3, 2, 4, 5.
- Diagram 5: 3 and 2 are compared and swapped: 1, 2, 3, 4, 5.
- Diagram 6: 3 and 4 are compared and swapped: 1, 2, 4, 3, 5.
- Diagram 7: 4 and 3 are compared and swapped: 1, 2, 3, 4, 5.
- Diagram 8: Final state: 1, 2, 3, 4, 5.
